Subject: Turkey Point Expansion

We implore you to deny approval to expand the aging Turkey Point nuclear plant in South Dade Florida.

We support necessary nuclear energy but certainly not expanding the initial error of placing such a facility in a location exposed to violent storms and surrounded by irreplaceable, fragile National Parks.

There are significantly large, low population sites on the eastern Florida shoreline that could be used for a modern nuclear facility. It is simply irresponsible to increase the already inflicted damage and the threat to our vulnerable area.

Thank you

Arthur & Joan Birsh
Key Largo, FL
