Subject: We are opposed to Turkey Point Nuclear Power Expansion

Hello,

Given the dangers of hurricanes, sea level rise, and the demands on South Florida fresh water needed to cool the existing plant, any expansion is not only foolhardy but a danger and detrimental to the health and welfare of the South Florida human and marine population.

FPL is already operating cooling based upon "emergency" draw down, so is using fresh water never anticipated in the original operating plan and that will only get worse.

More nuclear electric generating plants would not only be a danger, but will also severely impact billions of dollars in value of the business, homes, and infrastructure of Miami-Dade county and beyond.

If granted, I for one would move my manufacturing and marketing facilities out of south Florida.

Respectfully,

Sheila Boyce
