Subject: Proposed Nuclear Expansion of Turkey Point

I would like to strenuously oppose Florida Power & Light's proposed expansion of nuclear facilities at Turkey Point. My understanding is that their proposal involves antiquated technology and would be highly vulnerable to modest storm surges. Alternative power sources, such a solar, wind and waves, are being successfully used elsewhere. We do not want more nuclear facilities adjacent to our growing urban area.

The municipalities of Homestead and Florida City have allowed extensive residential development east of U.S. 1 and within a few miles of the Turkey Point plant. Moreover, most of the most populous areas of Miami-Dade County are downwind of the plant and within a few dozen miles of it. Please note the following:

The RPHP "Tooth Fairy Project-" grew out of the work of Dr. Jay Gould, Director of the Radiation and Public Health Project (RPHP) and author of *The Enemy Within: The High Cost of Living Near Nuclear Reactors*. By analyzing 50 years of US National Cancer Institute data, Dr. Gould proved that...

...of the 3,000-odd counties in the United States, women living in about 1,300 nuclear counties (located within 100 miles of a reactor) are at the greatest risk of dying of breast cancer.

Dr. Gould found even higher risks for prostate cancer among men living in nuclear counties.

Thank you for opposing this dangerous and unnecessary proposal.
