Subject: STOP NUCLEAR EXPANSION

Dear Members of the Nuclear Regulatory Commission,

I find today's Miami Herald Op-Ed by Mayor Tomás Regalado, Mayor Cindy Lerner and Mayor Philip Stoddard along with State Representative José Javier Rodríguez to be most informative about plans for expansion of a Florida energy source.

This news is disturbing on many levels. I feel the information that it will reduce safe drinking water and disruptive the tender ecology of the area to be a huge negative for placing nuclear reactors in Miami-Dade County.

"FPL's project would reduce the availability of fresh water for our communities, it would commit South Florida to antiquated and expensive nuclear technology from last century, and it would render our electric system vulnerable to storm surges from rising seas. FPL ignores these difficult facts."

There are so many reasons to develop a forward thinking plan and reduce waste of our precious water. Nuclear is not the way forward.

We need a vision that is not harmful to the environment and uses sound thinking and heartfelt discion making to find our way forward.

Please consider the harm done to the environment and the shared habitat to sea life and land animals, to the birds as well as the human life forms on this planet.

FPL's nuclear-power plan regressive, harmful

Thank you,

--

DG
