Subject: Turkey Point Nuclear Power Plant Expansion

Dear Sir,

I am a long time proponent of nuclear power and I have never considered myself to be particularly an environmentalist, but I strongly urge the denial of FPL's expansion of the Turkey Point facility.

Having spent time trying to understand the pros and cons of the planned expansion, it seems clear to me that the extensive environmental damage significantly outweighs the gains from the expansion. I have come to this conclusion in spite of being an investor in public utilities and generally having a bias toward FPL.

Sincerely,

Harold J Hudson
