Subject: Turkey Point nuclear expansion project

Sirs

As residents of Key Largo, we oppose the expansion of the Turkey Point nuclear plant. We are within 15 miles of the facility, but we oppose the expansion for other reasons. The existing cooling canals exceeded the 100 degree limit many times last summer. We do not feel that the plan to accommodate 2 additional reactors is adequate and environmental damage is inevitable.

In addition, the assumptions made about sea level rise are inaccurate. If they are, the plant will be an island before the units are taken out of service.

We are not against nuclear power, but feel that rural North Florida would be a better location since fewer people would be affected in the event of a system problem. Being in South Florida, we feel that solar power would be a much better choice.

Sincerely

Robert and Teresa Ross
