Subject: Nuclear Power Plants

To Whom it May Concern:

As a lifelong resident of S. Florida (I was born in Miami in 1961 and have lived here ever since) I am asking that we NOT build any more nuclear power plants in South Florida. The risks are just too great. Our potential for solar energy has hardly been tapped. Please heed the warning of Fukushima, and don't build any more nuclear power plants on coastal sites, so vulnerable to hurricanes, rising sea levels, and more. Thanks for your consideration.
