Attn: Document Control Desk

Subject: Correction to Annual Report, MIT Research Reactor, Docket No. 50-20.

Gentlemen and Ladies:

As a result of a review, we have discovered a clerical error in the 2014 annual report for the MIT Research Reactor. The mass of the first solid waste shipment listed in table H-2 was incorrectly listed as 461 lbs. The correct weight should be 844 lbs. We regret the error.

Sincerely,

Thomas H. Newton, Jr., Ph.D.  
Director of Reactor Operations
