Subject: Strata Semi-Annual Effluent Report

John,

Staff reviewed the Strata Energy, Inc., first half 2014 Semi-Annual Report as required by 10 CFR 40.65 and dated August 11, 2014 (ML14234A074). Strata provided twelve months of continuous pre-operational sampling in accordance with Regulatory Guide 4.14. The licensee reported that there were no operational activities due to construction of the facility. Therefore, staff determined that there were no effluents and no environmental sampling to monitor or data to report from operational activities. NRC acknowledges receipt of this report and do not have any comments due to the lack of operational activities.

Jim Webb
