**RE: Request for License Amendment  
Materials License No. 47-35056-01**

Gentlemen:

The purpose of this letter is to request an amendment to the above referenced materials license as described below.

In March of this year we requested the addition of one Ohmart/Vega Model SHF1A source head containing 5 millicuries of Cs-137 to be added to our license. Our vendor has advised that this quantity should have been three (3) devices each containing 5 millicuries of Cs-137. Therefore, we request that item 8.A. be amended to read:

"425 millicuries total and no single source to exceed the maximum activity specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission or an Agreement State."

All other conditions of the license, previously submitted procedures and/or representations remain the same. If you have any questions, please contact me at (304) 665-1635 or [doug.rexroad@allnex.com](mailto:doug.rexroad@allnex.com). We would appreciate any assistance you could be in expediting this amendment since our vendor is ready to ship the gauges.

Sincerely,

Gus Barbarito  
Plant Manager
