The purpose of this inspection was to determine whether activities authorized by the license were conducted safely, and in accordance with NRC requirements. The enclosed report presents the results of the inspection, that were discussed with you and members of your staff, during an exit meeting held at the conclusion of the inspection on April 9, 2015, and then again during a re-exit meeting on May 4, 2015.

Areas examined during this inspection included management structure, item monitoring, process monitoring, measurement systems and control, physical inventory, internal control, alarm resolution, and recordkeeping. Within these areas, the inspection consisted of performance tests, selective examinations of procedures and representative records, interviews with personnel, and observations of process activities.
