3. Letter from Q. S. Lies, I&M, to NRC, "Donald C. Cook Nuclear Plant Unit 1, Response To a Request for Additional Information Regarding the Emergency License Amendment Request to Extend the Allowed Outage Time for an Emergency Diesel Generator," AEP-NRC-2015-52, dated May 30, 2015.

By Reference 1, Indiana Michigan Power Company (I&M), the licensee for Donald C. Cook Nuclear Plant (CNP) Unit 1, submitted an Emergency License Amendment Request to amend the Appendix A Technical Specifications (TS) for Renewed Facility Operating License DPR-58. The proposed amendment would revise TS 3.8.1 to permit extending the Completion Time from 14 days to 65 days for an inoperable emergency diesel generator (EDG). The proposed amendment would also revise the TS Surveillance Requirement (SR) 3.8.1.2 and 3.8.1.3 to extend the Surveillance Frequency (SF) from 31 days to 82 days, or within three days following the inoperable EDG being restored to service, and TS SR 3.8.1.7 to extend the SF from 92 days to 145 days, or within three days following the inoperable EDG being restored to service. By References 2 and 3, I&M supplemented Reference 1.

I&M has concluded that the proposed changes requested in the above references are no longer necessary, as CNP Unit 1 has begun shutdown to comply with TS Requirements.
