

NRC Technical Basis for CASS aging management

MRP 2015-025 vs. BWRVIP-100

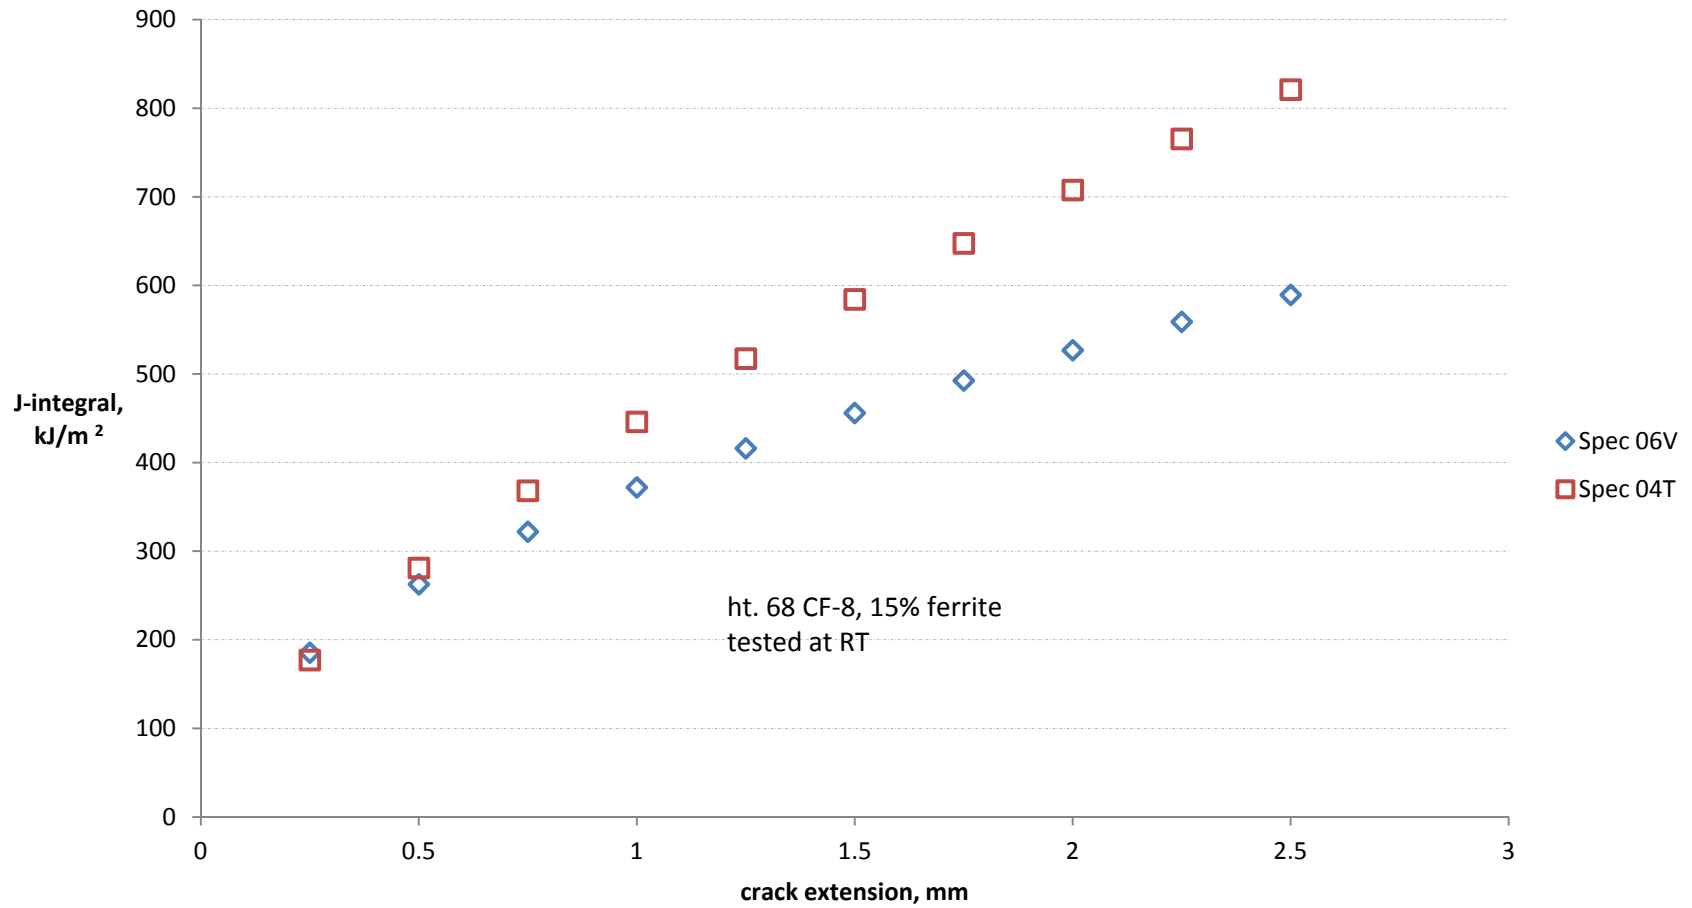

Slide 2

GP1

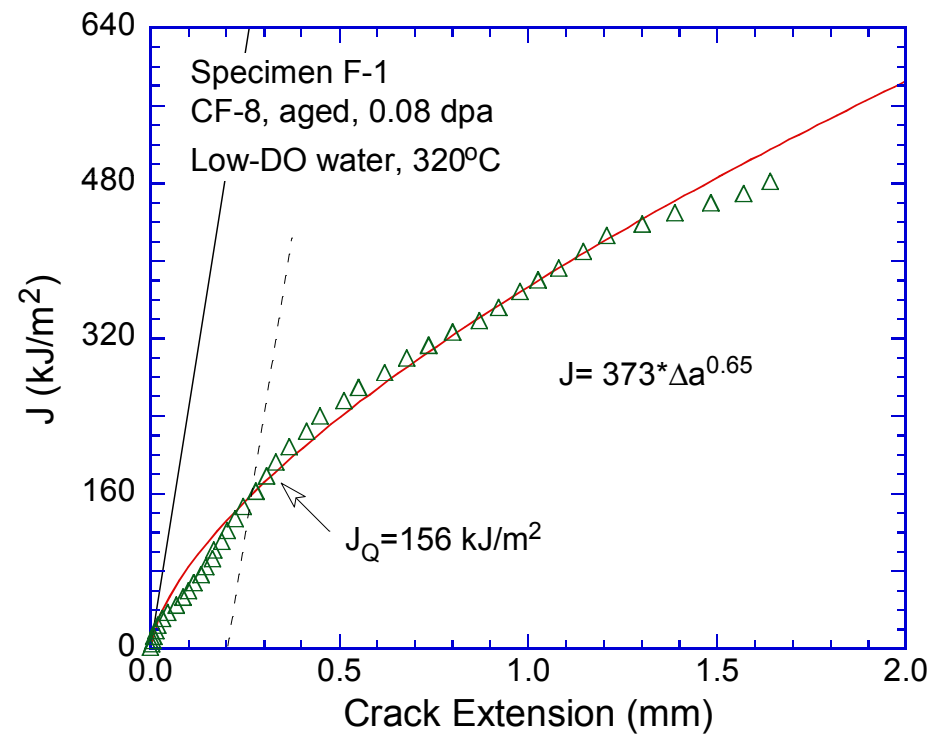

isn't this correct for our position?

Grandest Poo-Bah, 6/27/2014

Different toughness metric

J @ 1 mm for acceptance

GI

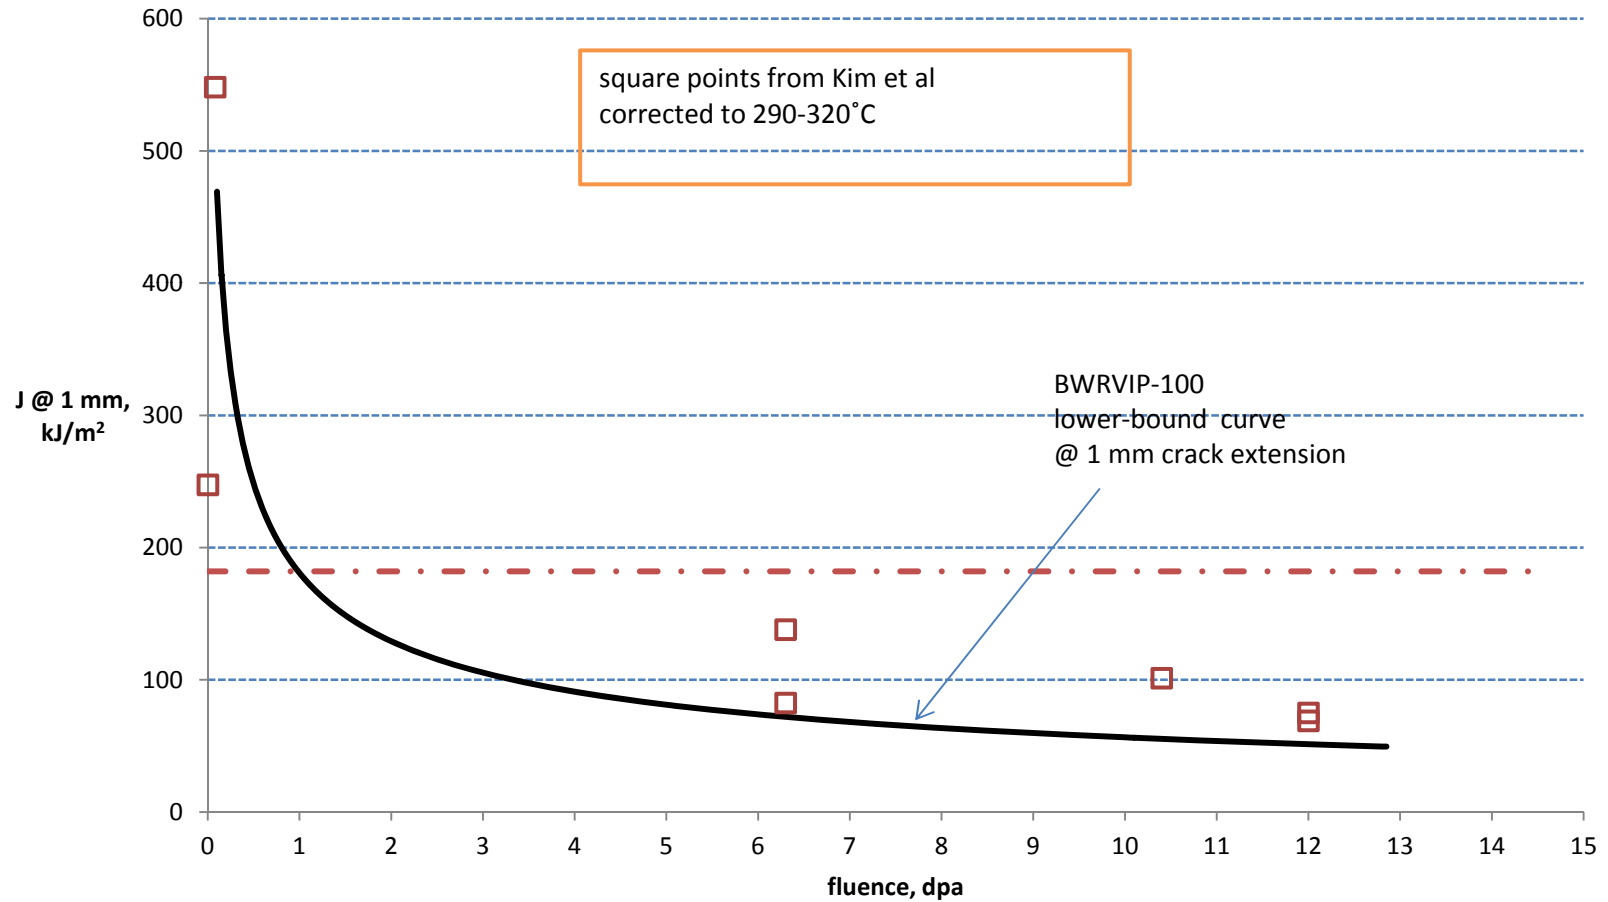

Slide 4

GP2

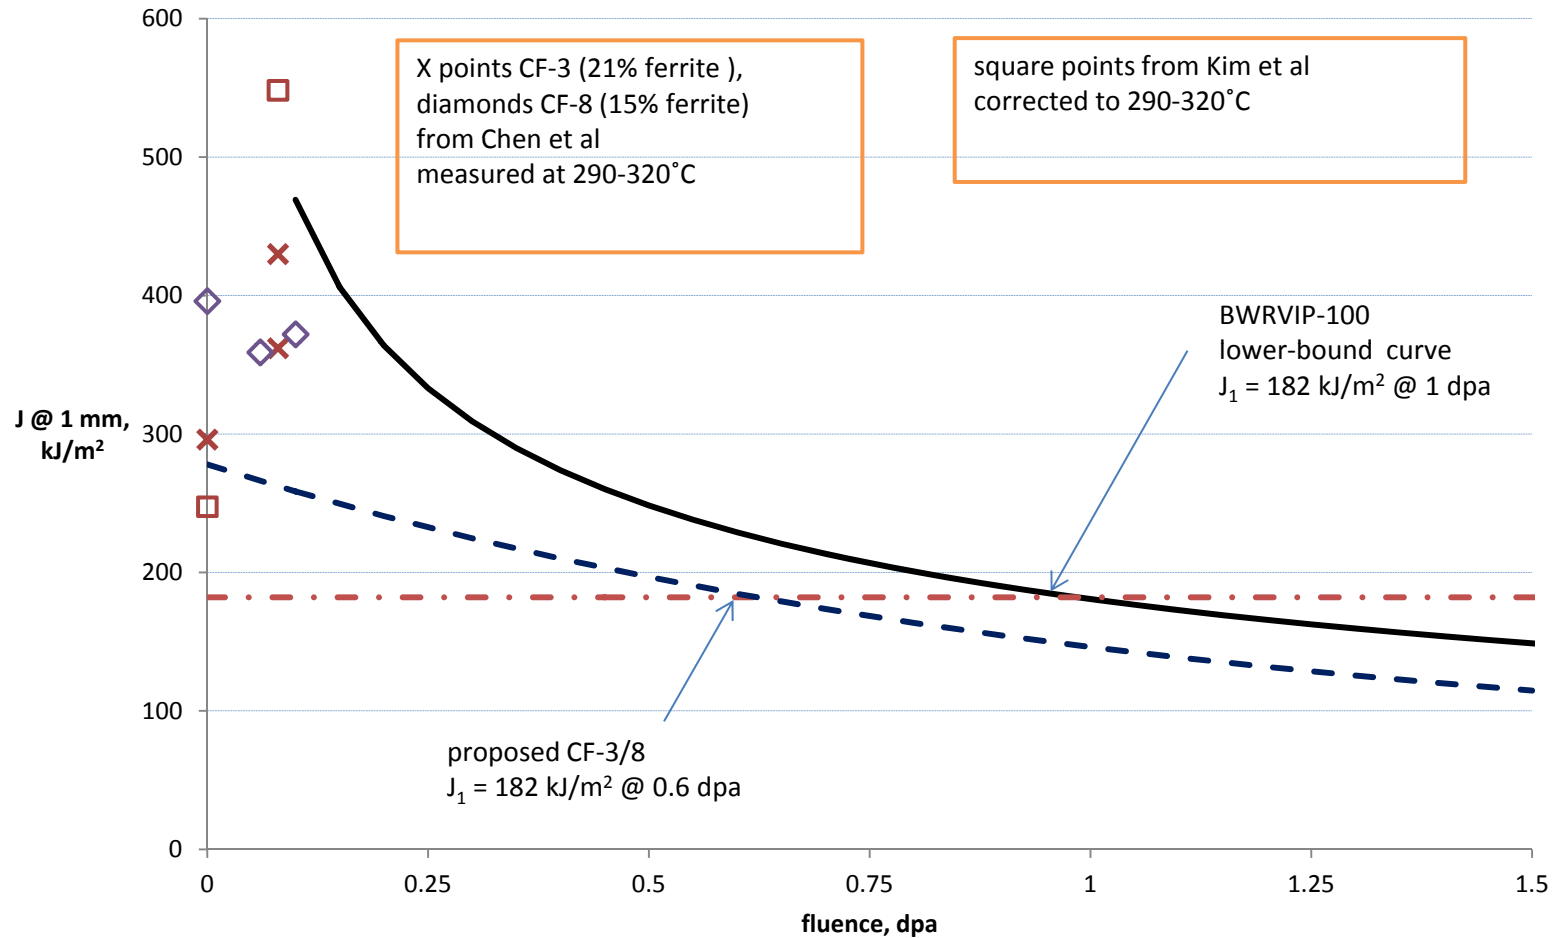

should be "loss of fracture toughness" instead of embrittlement

Grandest Poo-Bah, 6/27/2014

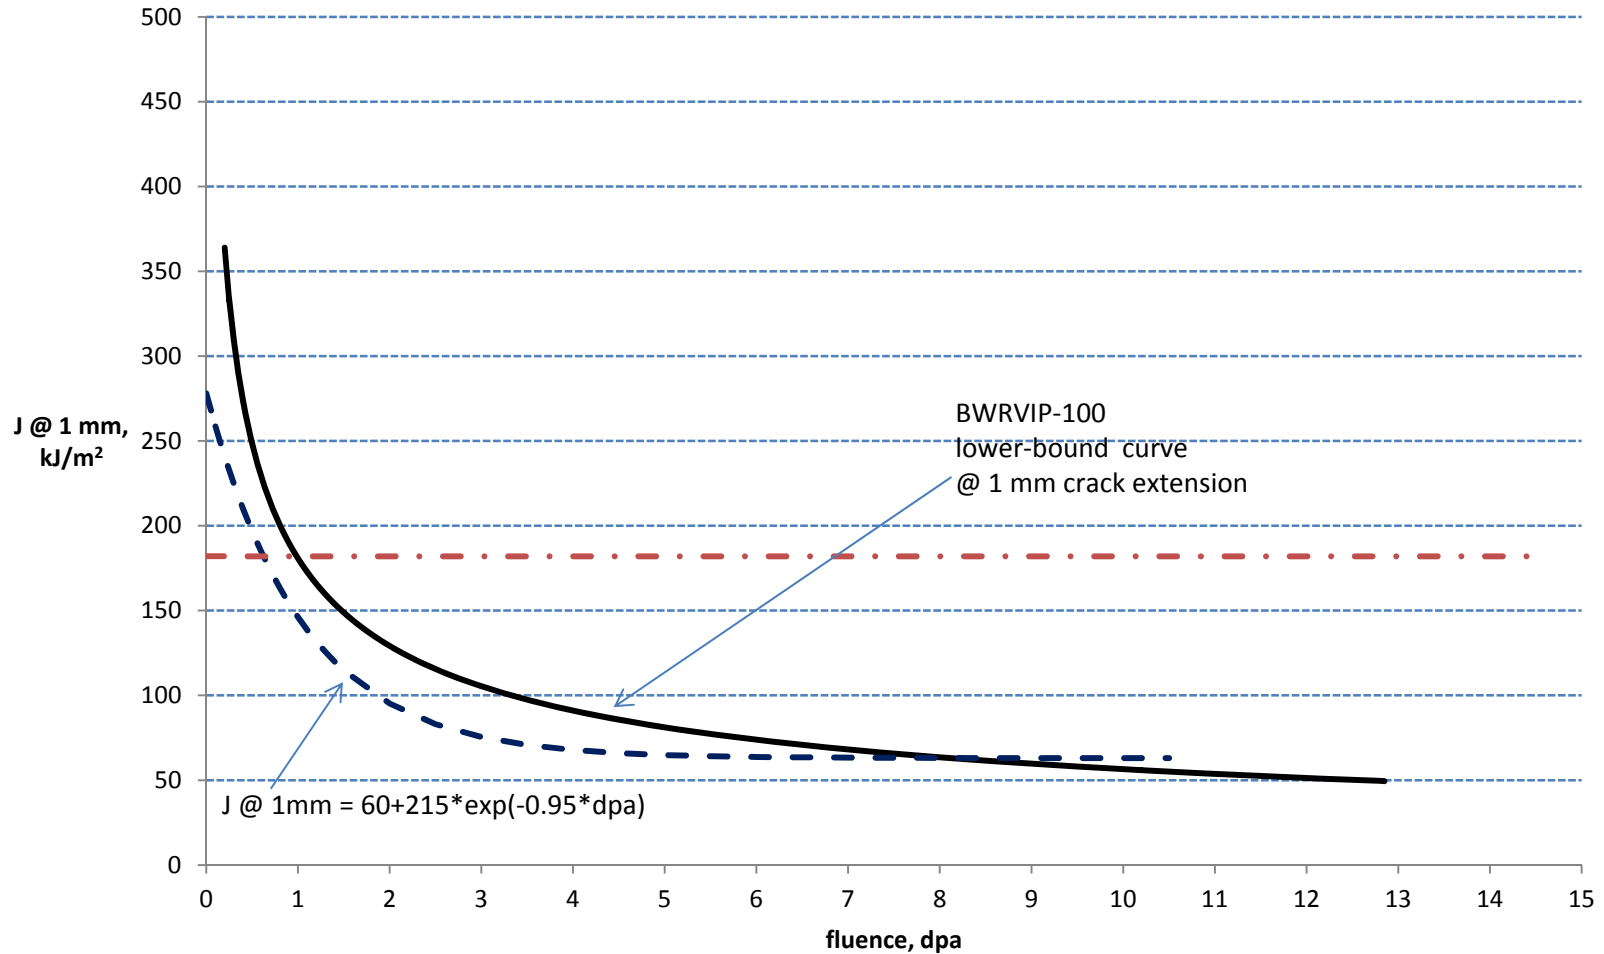

Corrected J @ 1 for test temperature, include TE alone (0 dpa)

Adding ANL data, J_1 trend@ 0 dpa anchored at lower-bound for 10-15% ferrite static CF-8

Proposed CF-3/8 lower bound trend vs. BWRVIP-100
