Subject: I Oppose the Proposed Expansion of Turkey Point, Docket ID: NRC-2009-0337

May 16, 2015

Chief Cindy Bladley

U.S. Nuclear Regulatory Commission, Office of Administration, OWFN 12
H8
Washington, DC 20555

Dear Chief Bladley,

I am writing in reference to Docket ID: NRC-2009-0337 to express my very strong and complete opposition to the proposed expansion of Turkey Point Power Plant, located in Homestead, Florida. The site proposed for expansion is located directly on the shores of Biscayne National Park in an area that is extremely susceptible to sea level rise and the impacts of climate change. The expansion of Turkey Point could have extremely serious environmental impacts on sensitive ecological habitat and the health and sustainability of limited freshwater resources. As a matter of fact I strongly feel it would be absolutely stupid and absurd to expand this plant. Also I strongly feel that this existing plant should be shut down and dismantled as soon as possible!!!

Like so many Americans, I am totally committed to protecting the National Park System, which preserves our country's incredible array of landscapes, waters, wildlife, and opportunities for exploration.

Biscayne National Park is an irreplaceable national treasure that safeguards precious natural resources and recreational opportunities.

According to the Nuclear Regulatory Commission's own regulations, "sites adjacent to lands devoted to public use may be considered unsuitable," and unacceptable impacts are "most apt to arise in areas adjacent to natural-resource-oriented areas." Within six miles of the proposed expansion site, there are two national parks, an aquatic preserve, a national wildlife refuge, and a wetland habitat preserve. In following the NRC's own guidelines, the expansion of Turkey Point could certainly have very serious, unacceptable and irreversible impacts on these treasured sites. This expansion should ABSOLUTELY NEVER HAPPEN!!!!!!!!!! Think Fukushima!!!

Operating two new reactors at Turkey Point could also have huge impacts on the quantity and quality of precious freshwater resources. The withdrawal of massive amounts of water from under Biscayne Bay as back-up cooling water could increase salinity levels within the Bay and hasten saltwater intrusion into our limited freshwater supplies.

Furthermore, expanding a nuclear power plant in an area that is ground zero for sea level rise threatens the future of South Florida. ANY SUCH HAPPENING IS CERTAINLY UNACCEPTABLE!!!!!!!!!! I strongly oppose the expansion of Turkey Point as proposed due to the project's potentially widespread negative environmental and public health and safety impacts and the serious threats it poses to Biscayne National Park. PLEASE DO NOT ALLOW THIS TO HAPPEN, WE DO NOT NEED A BIGGER PLANT!!!

Thank you for considering my request.

Sincerely,

Mr. Kim Young
