4. CLIN E005 for Reimbursable Work Orders (RWO) is increased by \$279,999.72 from \$640,480.88 to \$920,480.60 (see detailed table on page 5). The increase of the RWO portion of the contract is a result of the following projects:

1. Restripe and repair the Lot 4 driveway and visitor parking areas. This is needed due to the rearrangement of the pedestrian traffic flow behind the buildings. The restriping of the asphalt is needed to provide walkways and be compliant with ADA rules for handicapped individuals. Additionally, there are a number of areas that require repair due to winter weather. These areas have cracks that exceed the ADA requirements for safe travel with wheel chairs. Also, as a preventative measure NRC will seal the asphalt to extend its useful life.
2. Polish and seal the floor in the Link and replace the existing unsafe carpet runners with new runners. The existing carpets are very old and they are becoming unserviceable. The cleaning and sealing of the floor is a preventative measure to maintain the floor.
3. Replacement of cafeteria grease traps in TWFN. The NRC has been issued a citation by WSSC identifying that our current grease trap is noncompliant. Failure to replace this unit could result in having to shut down the cafeteria. Replacement of this unit is not optional.
4. Installation of chill water cross connects for TWFN. This modification is needed to support the remaining data center move to 3WFN. Due to the changing loads for cooling in the building the NRC must have a cross connect between the base building cooling system and the 24/7 tenant system to maintain an operational cooling system. This will allow one chiller to operate all the cooling systems. As an added benefit, this will reduce overall electrical consumption in TWFN.
