**RE: Homestake Mining Company's (Homestake) Water Use Report Letter of Information No. 650
for May 2015**

Dear Sir or Madam,

This information is relative to files 1605 and B-28 for May 2015.

On May 26, 2015 the meter readings for wells B-28-S, B-28, B-28-S-329, and B-28-POD1338 were 388,659,744, 143,437,000, 84,106,000, and 550,007,000, [from additional well information] respectively.

Metered gallons of 58,220,343 [total water injected] or 178.7 acre-feet (see next to last column in Table 1) were injected into wells in the San Mateo alluvial aquifer and the upper Chinle Formation, all located in Sections 26, 27, 28, 29 and 35 T12N, R10W. As stated in Permit No. 1605 and B-28 Temp, Homestake requests return flow credits for water that is returned to underground aquifers. A portion of this injected water was alluvial aquifer water treated by reverse osmosis.

In addition to the normal collection/injection system, Homestake also operates within the DP-200 permit a series of collection wells pumped for water that is re-injected into a series of injection wells. Since this is a contained system, the collection water for re-injection is not counted as part of the monthly water balance, because the water extracted is directly re-injected.

A monthly total of [industrial diversion] 62,936,302 metered gallons or 193.1 acre-feet (see tenth column in Table 1) of water were pumped from Homestake's production wells, of which 58,220,343 metered gallons [total water injected], were returned to the Bluewater underground water basin. Metered water used for industrial purposes was [industrial consumption] 4,715,959 gallons or 14.5 acre feet for May, respectively. Metered gallons of 0 or 0 acre-feet were pumped from Homestake's irrigation wells during May and used to irrigate a portion of the 394 acres of cropland on Homestake property situated in portions of Sections 28, 33 and 34. Crop irrigation ceased on October 31, 2012.

Thank you very much for your time and attention, if you have any questions regarding the foregoing information I can be reached at 505-287-4456 extension 34 or directly via cell phone at 505-290-3067.

Respectfully,

Jesse R. Toepfer
