SUBJECT: REQUALIFICATION PROGRAM INSPECTION

Dear Mr. Hanson:

In a telephone conversation on June 24, 2015, Mr. R. Cameron, Braidwood Station Operations Training Manager, and Mr. D. McNeil, Senior Operations Engineer, made arrangements for the U.S. Nuclear Regulatory Commission (NRC) to inspect the licensed operator requalification program at the Braidwood Station. The inspection is planned for the week of September 14, 2015, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the written examinations used during the 2014 requalification examination cycle and operating tests scheduled for use during the week of the inspection to the NRC by September 8, 2015. Mr. Cameron has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
