RE: Materials License No.: 24-13365-01
Notice of change of ownership of Analytical Bio-Chemistry Laboratories, Inc.

I am writing to inform you of the anticipated change in ownership of Analytical Bio-Chemistry Laboratories, Inc. ("ABC"), which is currently anticipated to close on July 8, 2015. ABC holds Materials License No.: 24-13365.01 (the "Radioactive Materials License") which permits authorized activities to take place at 7200 East ABC Lane, Columbia, Missouri and 4780 Discovery Drive, Columbia, Missouri. ABC will merge with and into an acquisition subsidiary formed by EAG, Inc. ("EAG") and EAG will become the new owner of ABC (the "Transaction").

ABC will be the surviving entity in the merger and after the closing of the merger, will be a wholly-owned subsidiary of EAG. Accordingly, the name, address, and business activity of, and the contact person for, each of the licensed facilities will remain the same as they were before the closing. On the date of closing, ABC will undergo the change of ownership described above.

This Transaction will not result in any change in the use, possession, location, or storage of licensed radioactive materials by the Licensee, nor will it result in any change in the facilities, equipment, procedures, or personnel that would require an amendment to the Radioactive Materials License.

Pursuant to the instructions obtained via telephone conversation with Jennifer Dalzell-Bishop of your office, we have enclosed as Exhibit A written responses to the questions posed by the NRC in situations involving changes in ownership or transfers of control (NUREG-1556, Volume 15, Appendix F). Based on the facts described herein, it is our understanding that the Transaction will constitute a change of ownership but not a transfer of control for purposes of ABC's Radioactive Materials License.

We respectfully request a determination from your office regarding whether the Transaction will require filing of any additional materials or otherwise require further action with or approval by the NRC. Thank you for your consideration of this request. If you have any questions or require

RECEIVED JUL 08 2015

additional information, please do not hesitate to contact me at 573-777-6076 or by cell phone at 573-489-4272.

Sincerely,

Troy DeVault

Exhibit A

Response to questions posed by the NRC (NUREG-1556, Volume 15, Appendix F) of the Licensee concerning changes of control.

- 1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.**

Response: Analytical Biochemistry Laboratories, Inc. ("Licensee") will be merged with and into an acquisition subsidiary formed and wholly-owned by Evans Analytical Group, Inc. Analytical Biochemistry Laboratories, Inc. will be the surviving company in the merger and its name will not change (collectively, the "Transaction").

- 2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.**

Response: No changes in personnel or duties that relate to the licensed program will occur as a result of the Transaction.

- 3. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.**

Response: No changes in the organization, location, facilities, equipment or procedures that relate to the licensed program are planned as a result of the Transaction. The Licensee will continue the employment of all personnel involved in the licensed activities, including the Radiation Safety Officer and Radiation Safety Committee Chair, in accordance with all requirements of the license and applicable regulations. The RSO and RSC will continue to have the authority to determine radiation safety policy and specifically the direction of the activities under the license.

4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.

Response: No changes in the status of the surveillance programs have occurred at the present time, or are expected to occur following the Transaction.

5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or the NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivities.

Response: Because there will be no change at the operational level as a result of the Transaction, the Transaction will not involve physical relocation of any records. All records regarding the safe and effective decommissioning of the Licensee's facility will remain with the Licensee.

6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Response: Because there will be no change at the operational level as a result of the Transaction, the "transferor" and "transferee" will be one and the same party (i.e., the current Licensee). Accordingly, the current Licensee will continue to abide by all constraints, conditions, requirements, and commitments currently in place with respect to the licensed programs.
