Charlotte, NC 28201-1006

SUBJECT: WILLIAM STATES LEE III NUCLEAR STATION COMBINED LICENSE
APPLICATION – ADVANCED SAFETY EVALUATION WITH NO OPEN ITEMS
FOR CHAPTER 2.0 – 2.3, “SITE CHARACTERISTICS AND SITE
PARAMETERS”

Dear Mr. Fallon:

The U.S. Nuclear Regulatory Commission (NRC) staff is preparing an Advanced Safety Evaluation (ASE) with no Open Items (OIs) for each chapter of the William States Lee III Nuclear Station, Units 1 and 2 Combined license Application (COLA) submitted by Duke Energy Carolinas on December 12, 2007.

The NRC staff’s ASE with no OIs for Chapter 2.0 – 2.3, “Site Characteristics and Site Parameters” is being provided to the Advisory Committee on Reactor Safeguards (ACRS) to support upcoming meetings of the ACRS Subcommittee.

The enclosed ASE with no OIs is being provided only to Duke Energy for review of proprietary information pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390, “Public Inspections, Exemptions, Requests for Withholding.” The NRC staff concludes that the enclosed ASE does not contain any information for which exemption from public disclosure has been sought or approved, or any factual errors. However, the NRC will withhold the enclosed ASE from public disclosure for ten business days from the date of this letter to allow you the opportunity to verify the NRC staff’s conclusion that the ASE contains no such exempt information or any factual errors. If within that ten day period, you do not request that all or portions of the ASE be withheld from public disclosure, the enclosure will be made available for public inspection through the NRC Public Document Room and the Publicly Available Records component of NRC’s Agencywide Documents Access and Management System (ADAMS) and placed on the NRC public web page for this application.

Document transmitted herewith
contains sensitive unclassified
information. When separated from the
enclosure, this document is
“DECONTROLLED.”
