**Subject:** Pilgrim 2.206 petition on Current Licensing Basis for Flooding

**Expires:** Monday, September 14, 2015 12:00 AM

Murray,

This is to inform you that there is a new 2.206 petition request on Current Licensing Basis for flooding at Pilgrim. The petition information should be publicly available in ADAMS. In an e-mail, dated June 24, 2015, (ADAMS ML15187A397), David Lochbaum, Director of Union of Concerned Scientists, submitted a 2.206 petition on behalf of eight organizations and individuals. The petitioners request that NRC take enforcement action that results in heavy rainfall events (includes local intense precipitation/ probable maximum precipitation events) being included within the licensing basis for the Pilgrim nuclear power plant.

The petitioners have requested a teleconference to address the Petition Review Board before the PRB meets. It is expected to happen sometime in August. I will keep you informed. I am the Petition Manager for this petition.

Let me know if you have any questions,

Thanks, Booma

**Booma Venkataraman, P.E.**

*Project Manager, NRR/DORL/LPL1-1*
