 Vice President, Steam Production
 422 South Church Street
 Charlotte, North Carolina 28242

Gentlemen:

This office has received a copy of your May 16, 1978 request which you filed with the Division of Operating Reactors. The request relates to the installation of a limited number of sleeves in the steam generators at Oconee Unit Nos. 1, 2 and 3 to verify acceptable sleeve performance under operating conditions. The application was not accompanied by an approval fee as prescribed by Section 170.22 of 10 CFR Part 170 (copy enclosed). Requests for approvals such as that identified above should be classified in the same manner as applications for license amendments in Section 170.22. Section 170.12(c) requires that your company provide a proposed determination of the amendment (approval) class, state the basis therefor, and submit the fee with your application for an approval or amendment.

We have determined that the requested action falls in Class III for Oconee 1 (\$4,000) Class I for Oconee 2 and 3 (\$400 each) because the proposed action involves review of a single safety issue. You should forward fees totalling \$4,800 promptly to this office. Fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order. If after the final evaluation of your application is completed it is determined that it was incorrectly classified, you will be refunded any overpayment or billed for any additional amount due.

If we can be of assistance to you, call 301/492-7225.

Sincerely,

Original Signed by
 Wm. O. Miller
 William O. Miller, Chief
 License Fee Management Branch
 Office of Administration
