Re: Radioactive materials license amendment – response to information request
License #: 06-30624-01

Dear Ms. Weidner:

This letter serves as confirmation that your understanding of the requested renovations are accurate (as documented within your email sent to my attention earlier this afternoon). No changes are being made to the areas where radioactive material is prepared and stored (ie. the existing hot lab) and the recommended amount of shielding provided by Mike Bohan will be installed during construction.

You inquired as to the location of the SPECT camera and we would like to confirm that the location of the SPECT camera will remain unchanged per our current license, which was amended on 04 Aug 2014.

Please contact me directly at jseibyl@mnimaging.com if you have questions or concerns.

Thank you for your assistance regarding this matter.

Sincerely,

John Seibyl, MD
MNI General Partner & Radiation Safety Officer
