Duke Power Company  
ATTN: Mr. Hal B. Tucker  
Vice President, Steam Production  
Post Office Box 33189  
Charlotte, North Carolina 28242

Gentlemen:

We have received a copy of your application dated March 17, 1983, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application proposed certain Technical Specification changes regarding start-up transformers and allowable degraded conditions for the Oconee Nuclear Station Unit Nos. 1, 2 and 3. Fees pursuant to 10 CFR 170.22 were not remitted with your request inasmuch as you considered the March 17 application as being supplemental to a February 10, 1983 application.

Based on information provided by the ONRR staff as the result of their preliminary review of your application, it has been determined that a Class III fee (\$4,000) and two Class I fees (\$800) are appropriate for this request since the review will involve consideration of a single safety issue and two duplicate units. The ONRR staff have informed us that your March 17, 1983 application is not supplemental to the one dated February 10, 1983, since it contains an additional change unrelated to your February 10 application. Therefore, you are requested to remit the sum of \$4,800 to this office. If the ONRR staff's final review of your application reveals that these fees are not appropriate, you will be notified and any necessary adjustments will be made.

Sincerely,

Original Signed by:
