 - (2) NRC electronic mail to NextEra Energy Point Beach, LLC, dated July 28, 2015, LIC-109 Acceptance Review for Point Beach Nuclear Plant Units 1 and 2 – License Amendment Request 277, Revision to Staff Augmentation Times in the Point Beach Nuclear Plant Emergency Plan - MF6352/MF6351
 - (3) Teleconference between NextEra Energy Point Beach, LLC and Nuclear Security and Incident Response/Division of Preparedness and Response (NSIR/DPR) staff held July 31, 2015

In Reference 1, NextEra Energy Point Beach, LLC (NextEra) submitted a request for an amendment to revise the Point Beach Emergency Plan to increase the staff augmentation times for Emergency Response Organization (ERO) response functions.

In Reference 2, the NRC staff requested additional information to complete its acceptance review of the requested amendment.

In Reference 3, the NRC staff requested written justification if NextEra needed additional time to supplement its Requested Licensing Actions within the 13 day requirement of LIC-109.

Pursuant of LIC-109, "Acceptance Review Procedures," to resolve information insufficiencies, NextEra is requesting 7 additional working days (due August 28, 2015) to supplement License Amendment Request 277, "Revision to Staff Augmentation Times in the Point Beach Nuclear Plant Emergency Plan." The extension beyond the required 13 days is requested due to the need for thorough responses to the questions posed. In addition, NextEra recently completed a Hostile Action Based (HAB) pre-exercise on August 4, 2015, and is preparing for a HAB exercise on September 15, 2015. These activities are limiting availability of the personnel directly involved in preparing the supplemental information.

This letter contains no new regulatory commitments and no revisions to existing regulatory commitments.

If you have any questions regarding this letter, please contact Mr. Michael Millen, Director of Regulatory Project Implementation, at (920) 755-7845.

Sincerely,

for
