**Change of Control and/or Change of Ownership  
(Includes Change of Name)**

10 CFR 30.34(b) states that "no license issued or granted pursuant to the regulations...nor any right under a license shall be transferred, assigned or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of any license to any person, unless the Commission shall...find that the transfer is in accordance with the provisions of the Act and shall give its consent in writing. Although not specifically addressed by 10 CFR 30.34, licensees undergoing a name change may also be affected by this regulation.

Control over licensed activities can be construed as the authority to decide when and how a license (licensed material and/or activities) will be used. A change of ownership may be an example of a change of control. The central issue is whether the authority over the license has changed. In all cases, determining whether a change of control has taken place or whether a change is in name only is the Commission's responsibility.

Licensees must notify the Commission when they are undergoing a possible change of control and/or a change of name. While this notification is not required within a certain time frame, NRC needs adequate time to review the submittal to ensure that the transfer is in accordance with the regulations.

In order to process your request for a change of control/ownership and/or a name change, the information on the following pages is required. Our fax number is (817) 200-1188. If you have any questions regarding our discussion or this fax, please contact me. When responding to this fax, please include the license, docket, and mail control numbers, located at the top of this page as well as the following pages. Thank you.

Definitions: Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation.
