MEMORANDUM TO: Anthony J. Mendiola, Chief  
Licensing Processes Branch  
Division of Policy and Rulemaking  
Office of Nuclear Reactor Regulation

FROM: Jonathan G. Rowley, Project Manager */RA/*  
Licensing Processes Branch  
Division of Policy and Rulemaking  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF OCTOBER 29, 2014, CLOSED MEETING WITH THE  
PRESSURIZED WATER REACTOR OWNERS GROUP TO DISCUSS  
THE FUEL ASSEMBLY END-OF-LIFE SEISMIC/LOSS-OF-COOLANT  
ACCIDENT PROJECT

On October 29, 2014, a closed meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and the Pressurized Water Reactor Owners Group (PWROG) regarding the PWROG Fuel Assembly End-of Life (EOL) Seismic/Loss-of-Coolant Accident (LOCA) Project. The purpose of this meeting was to discuss the PWROG project to address issues with Westinghouse Electric Company (Westinghouse) current licensed seismic/LOCA methodologies that resulted from the issuance of NRC Information Notice 2012-09 in June 2012. The current Westinghouse methodologies are based on beginning-of-life conditions. The information notice questions various assumptions with the current methodologies based on recent experience. The project is intended to use EOL conditions to update seismic/LOCA analysis.

A list of attendees is enclosed. The proprietary version of the PWROG presentation is available in the NRC Agencywide Documents Access and Management System at Accession No. ML15058A081.

Project No. 694
