ORGANIZATION Positron Corp.		DOCKET NUMBER(S) 030-38150	<input checked="" type="checkbox"/> TELEPHONE	<input type="checkbox"/> OUTGOING
LICENSE NUMBER(S) 13-32765-01		CONTROL NUMBER(S) 585899		

SUBJECT  
Amendment request to terminate the license

SUMMARY AND ACTION REQUIRED (IF ANY)

- Your submittal indicates that the "RAM Room" was the only location where radioactive material was ever used and stored under this license. In reviewing the original application for the license dated 9/14/09, we noted that there were two "research and development areas - access restricted while RAM is in use." Please either submit surveys of these areas, or if material was never used or stored in these areas, please make a statement as such.
- Please submit information about the instrumentation that was used to conduct the area surveys and analyze smears that were taken. Include minimum detectable activity for the instrument that was used to analyze smears, as well as the counting efficiency. Please also submit the raw data printout of the analysis of the smears. For both radiation level surveys and smears, please provide results of background readings or explain why they were not included.
- Provide a list of all sealed sources that were transferred along with the results of the last leak test for each source which demonstrates that the sources were not leaking at the time of transfer. If sources were in storage and never leak tested, at a minimum, they were required to be leak tested before being transferred for disposal. Please address this issue. *→ need this*
- The list of sealed sources that were disposed of did not include americium-241 and germanium-68. For each model number listed in your license for these two radionuclides, please account for any sources that you may have possessed. If you never took possession of these two radionuclides, please make a statement as such.
- Your license also authorizes a cobalt-57 sealed source model number BM04 series from international isotopes, a model NEC flood series from Eckert and Ziegler, and a model PHI-XXXG-GFS series A3201. The status of these sources was not described in you termination request. Please account for any of these sources that you may have possessed. If you never took possession of these model numbers, please make a statement as such.
