Subject: [External_Sender] Radioactive Waste Disposal 10 CFR61 Docket ID NRC-2011-0012

Dear Secretary,

I'm against 10 CFR 61 changes. NRC's job is too protect the public, not endanger them! This is common sense a child could understand.

The worse parts of your 'proposal':

Allowing deregulation of radioactive waste. It's insane to even entertain the thought of nuke waste to going to the regular trash, an unregulated location or even worse: recycling it into consumer products. Do you want us to die?? No one wants this (go back & reread the 1992 Energy Policy Act). Get rid of "\$ 61.6 Exemptions" and additions to "\$61.7 Concepts".

There shall be NO increase in radiation exposure to the public; they must ALL be stopped! No change from 25 millirems/year to the higher 25 millirems EDE, 100 millirems EDE, 500 millirems EDE or even more per year. No, no & no!

No "black box" Performance Assessments by dump operators: The cannot and will not police+regulate themselves!

DO NOT tamper with state authority, 'cause clearly the public can't trust NRC to protect them(!). Remove the "Level B" compatibility requirement.

Radioactive materials hazardous for 100 years or more HAS TO BE kept out of burial grounds. No 'legal pollution'(!). Shame on you, the NRC, for making us waste our time telling them you how to do you jobs! Do not do it again. If this is too much tho ask, then resign your posts—en masse—and we'll find someone who can(!).
