Subject: Additional information concerning amendment request

Discussion: The licensee requested to release a location of use on the license for unrestricted use. I contacted Mr. Hisel to answer some additional questions I had concerning the nuclides used at the location and to ask him to submit some additional information. I asked Mr. Hisel about the trace activation products listed in the authorized used history considering the location did not have a cyclotron producing radioactive materials. Mr. Hisel explained that the material was brought to the location from a cyclotron as raw F-18 and was synthesized at the location in requested to be released. He stated that because it was brought over as raw material, the material could have contained contaminates from activation. In addition, I asked Mr. Hisel to submit the most recent leak test record and a confirmation of receipt of materials from the facility that the licensee transferred their sealed sources to.
