Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. R. W. Reid, Chief  
Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

In your letter of June 2, 1980, you requested Duke Power Company to resubmit the proposed radiological effluent technical specifications (RETS) for the Oconee Nuclear Station. In response to your request, please find attached the revised RETS, which replace in their entirety the RETS previously submitted in my letter of March 29, 1979. Also attached for your information is a revised Offsite Dose Calculation Manual (ODCM) for Oconee. The attached ODCM, which completely replaces that submitted by my letter of March 29, has been restructured such that it consists of a generic section of all of the Duke nuclear power stations followed by an appendix which provides the site specific information for Oconee.

Your letter of June 2 also requested the proposed process control program (PCP) for the solid waste system. The PCP at Oconee was provided by Chem-Nuclear Systems, Incorporated. Information concerning this PCP was submitted by Chem-Nuclear to the NRC on July 10, 1979 as part of the information provided in the urea formaldehyde topical report. The PCP was contained in Chem-Nuclear Systems, Incorporated procedure No. SD-OP-001-NP. Duke Power Company considers that this information will satisfy your June 2 request.

It should be noted that the effluent flow rate monitor listed in Table 3.5.5-2 of the proposed specifications for the Interim Radwaste Building presently does not exist. A station modification will be performed to install this monitor. However, it is not expected that this installation will be completed until November 1, 1981. Therefore, it is requested that Oconee be relieved from specifications concerning this monitor until it is installed, should the proposed Technical Specifications be approved prior to that time.

Page Two

Furthermore, it is requested that upon approval of the proposed specifications, a period of 30 days be allowed before the specifications become effective. This period is necessary in order to make procedure changes as required in order to conform with the new specifications.

This submittal for a proposed license amendment to the Oconee Nuclear Station Facility Operating License to incorporate the RETS into the Oconee Technical Specifications completely supercedes the submittal of March 29, 1979. Inasmuch as this proposed amendment is being submitted at the request of the Commission, no license fees are provided.

Very truly yours,

A handwritten signature in cursive script that reads "William O. Parker, Jr." followed by a stylized flourish.
