Mr. M. Carrington, Project Manager  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

TRANSMITTAL OF TECHNICAL EVALUATION REPORT FOR THE REVIEW AND EVALUATION OF THE BABCOCK AND WILCOX OWNERS GROUP DESIGN REASSESSMENT PROGRAM RELATED TO OCONEE-1, -2, AND -3, TMI-1, ANO-2, DAVIS-BESSE, RANCHO SECO, AND CRYSTAL RIVER-3, EGG-NTA-7585, MARCH 87 - EWR-39-87

Ref: INEL Technical Assistance To The Office of Nuclear Reactor Regulation, "Review of Plant-Specific Licensing Actions for Operating Reactor Issues" (FIN D6023), Task 5-2, Revision 1

Dear Mr. Carrington:

In accordance with the above reference, INEL is providing technical assistance to the Nuclear Regulatory Commission, Office of Nuclear Reactor Regulation, in the evaluation of plant-specific licensing actions.

Task 5-2, Revision 1 called for INEL to provide technical assistance to the NRC-NRR Plant Electrical, Instrumentation and Control Branch (PEICSB) by preparing for and participating in a meeting between the Babcock and Wilcox Owners Group (B&WOG) and the NRC on December 10, 1986. INEL is also to provide a technical evaluation of selected portions of B&W report BAW-1919, Revisions 1 and 2, under Task 5-2, Revision 1.

Enclosed is a copy of a Technical Evaluation Report (TER) and comments on the December 10, 1986, meeting, which were prepared by Mr. J. T. Beard, a subcontractor to EG&G Idaho, Inc., under Contract C86-101074. The enclosed material completes part of the work scope requirements of Task 5-2, Revision 1. The task will be completed when the B&WOG submits the final draft of BAW-1919 for review.

Very truly yours,

E. Wayne Roberts, Manager  
NRC Headquarters Support
