Operating Reactors Branch No. 4

Re: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

In a letter dated August 21, 1979, the Staff requested that a detailed analysis of the thermal-mechanical conditions of the reactor vessel during recovery from small breaks with extended loss of all feedwater be performed. My letters of December 21, 1979 addressed a delay in providing this analysis.

This effort has been further delayed and is currently expected to be provided in late March 1980. Consequently, following our informal review, the report will be submitted by April 15, 1980.

Very truly yours,

  
William O. Parker, Jr.
