Charlotte, North Carolina 28242

Dear Mr. Parker:

This letter is in regard to the need for updated Technical Specifications (TS) at the Oconee Nuclear Station for the Fire Protection Program. In our Safety Evaluation of August 11, 1978 in Section 7.0 Technical Specifications we stated, "Following the implementation of the modifications of fire protection systems and administrative controls resulting from this review, the TS will be similarly modified to incorporate the limiting conditions for operation and surveillance requirements for these modifications".

To assist you in preparing these TS we are enclosing a Model TS. You will have to appropriately adapt the Model to the Oconee Station requirements. The proposed Fire Protection Rule does not specify a date by which these TS must be in place. Since the existing Fire Protection Program TS were issued on February 13, 1978, there have been extensive changes made at the Station. The TS should be modified in an expeditious manner to reflect the changed status of the Station. We request that you submit the proposed TS by January 15, 1981.

In the interim period, prior to our issuance of the license amendment with the TS, these surveillance requirements and supporting action statements for the new equipment should be implemented by administrative control as quickly as possible.

Sincerely,

Original signed by
Robert W. Reid
