Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

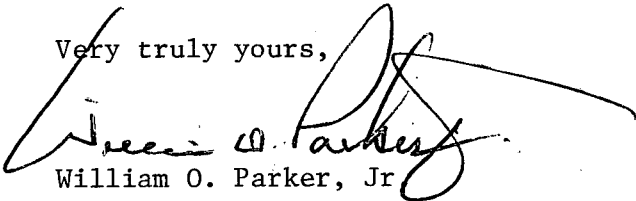

Dear Sir:

Attached please find four copies of the draft Abnormal Transient Operating Guidelines for Oconee Nuclear Station. These documents are being submitted pursuant to the commitment made in my letter dated January 2, 1981 and in response to the requirements of NUREG-0737, Item I.C.1.

These documents are being submitted upon receipt and have not been reviewed or commented upon by Duke Power. It is considered that these guidelines have been prepared consistent with the discussions that have been held between the Staff and the B&W Owners Group since August 1979. Staff review of these guidelines, which have been generated from Duke reviewed Event Trees, Safety Sequence Diagrams, and System Auxiliary Diagrams, is required by NUREG-0737. The supporting documents are also available for Staff review, upon request.

Very truly yours,

William O. Parker, Jr.
