Re: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

My letter of April 3, 1981, concerning the emergency feedwater system at Oconee, stated that modifications would be implemented by May 30, 1981 to make the turbine driven emergency feedwater pump on each unit independent of AC power. However, due to delays in the completion of the design work, implementation of the modifications has not been completed. It is now expected that this work will be completed on Unit 3 by June 10, 1981; on Unit 2 by July 17, 1981; and on Unit 1 by the end of its next refueling outage (scheduled to begin later this month). Any changes in this schedule will be brought to your attention.

Very truly yours,

*William O. Parker Jr.*
