Re: Oconee Nuclear Station
Docket Nos. 50-269, 50-270, 50-287
Control of Heavy Loads, NUREG-0612
File: OS-20.7.2

Dear Mr. Denton:

On December 22, 1980, a generic letter was sent to all licensees and holders of construction permits requesting a review of the controls for handling heavy loads. This letter requested that certain interim actions be implemented and that reports documenting the results of the review of load handling systems be submitted.

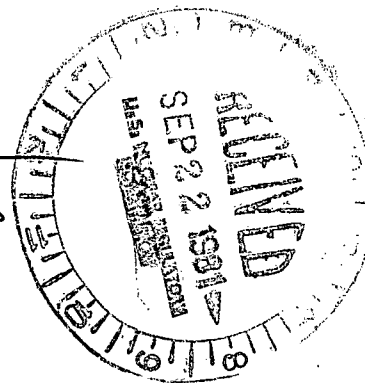

Pursuant to that generic letter, an evaluation is underway to assess load handling operations and loads in order to comply with section 2.1 of the generic letter. Attached is the submittal for the Auxiliary Building and Spent Fuel Pool Area.

These reports will include implementation of the interim actions that were requested along with the generic letter.

Implementation of changes and modifications that are necessary because of this review will begin as soon as possible with completion within two years of the final submittal.

Very truly yours,

William O. Parker, Jr.
W. O. Parker, Jr., Vice-President
Steam Production Department
