Re: License No. 47-05972-02  
Docket No. 030-01142

Dear Mr. Lawyer,

The purpose of this letter is to give you an update on the progress being made in response to your review of our application for renewal of Materials License Number 47-05972-02, specifically as it relates to item 5.

After careful consideration of the options presented in your review regarding our possession limits, we concluded that the Type B specific license of broad scope still best suits the needs of Marshall University. Therefore funds have been secured and arrangements are being finalized for the disposal of sources that have put us over the limit of a Type B specific license of broad scope.

Sincerely,

William D. McCumbee, Ph.D.  
Radiation Safety Officer
