DUKE POWER

August 10, 1993

U.S. Nuclear Regulatory Commission
Attention Document Control Desk
Washington, DC 20555

Subject: Duke Power Company
Oconee Nuclear Station
Docket No. 50-270
Detailed Control Room Design Review (DCRDR)
Regulatory Guide 1.97

By letter of April 20, 1988, Duke committed to have all Regulatory Guide 1.97 and Human Engineering Discrepancy (HED) modifications on Unit 2 completed by the beginning of cycle 14. By letter of April 29, 1993 Duke committed to have the Low Pressure Service Water flow instruments to the Low Pressure Injection Coolers on Unit 2 modified to meet Regulatory Guide 1.97 requirements by the beginning of cycle 14. This letter is to inform NRC the last of the Unit 2 modifications, with the exception of those items identified in our November 18, 1992 letter which have been determined to be unnecessary, have been completed.

With the completion of the above modifications all Regulatory Guide 1.97 and Human Engineering Discrepancy (HED) modifications for all three Units have been completed, with the exception of the Unit's 1 and 3 Low Pressure Service Water flow instruments to the Low Pressure Injection Coolers. These modifications will be implemented as identified in Duke's letter of April 29, 1993.

If you have questions or need further information, please contact D. W. Dalton at (803) 885-3372.

Very truly yours,

J. W. Hampton
Site Vice President
