Mr. Gupta,

We will be making the arrangements for a public meeting. We will let you know of the available dates.
Regards,

Hipólito J. González, Branch Chief

Dear Chief González,

Thank you for your response and for outlining the two alternatives. I humbly request both -- a meeting in Rockville and also a sample of the engineering drawings that have satisfied the requirements of the regulations.

We are mindful that meeting with us as well as locating a sample for us would be an administrative overhead for the agency. However, please be assured that our motivation behind this is to ensure that you receive exactly the images you need so that overall overhead is eventually reduced for both parties.

Please advise on a meeting date as per your earliest convenience and as per the public meeting process. If it is possible to email the sample before the meeting, it would be most helpful in making the meeting even more productive.

Regards,

- Jay

Mr. Gupta,

This email is to acknowledge the reception of your letter, dated August 13, 2015, and voicemail message. As mentioned in our letter, dated August 11, 2015, you must submit the complete details of construction and design for each individual model of watches, including the locations of the tritium sources. In addition to the construction and design information, you must include any associated engineering drawings for each watch model, which include the locations of the tritium sources. I understand that Ms. Xu has provided clarification to Mr. Evans on this item previously (telephone conversation on July 9, 2015), but it seems that still there some clarification needed on this requirement.

In order to meet in our office in Rockville, Maryland, we must follow our public meeting process, which requires that we announce the meeting, at least 10 days, prior to the meeting date, so that the public may have an opportunity to participate, if they so choose. Please let us know if you wish to meet in our office.

An alternative, is that we can email you a sample of the engineering drawing that has satisfied the requirements of the regulations, and is a publicly available document. This may take some extra time, since we need to search our database system to locate such a document.

Please let me know, in order for us to prepare the meeting.

Regards,

Hipólito J. González, Branch Chief

Subject: [External_Sender] Meeting at your Rockville office

Hello Mr Gonzalez,

I just left you a v-message requesting a meeting at your office (as per the message sent last week). Would it be possible to schedule something for next week?

Please let me know and I will arrange for myself and Danny Evans (our radiation consultant) to make the trip to Rockville. Since the visual imagery appears to be the only remaining point of confusion, I would like to use the meeting as an opportunity to understand precisely what you need so we can provide exactly that information.

Thanks and regards,

- Jay
