## General Comment

There is no safe limits of Man Made Radiation for any life forms & the NRC's No Threshold is just plain crazy. Maybe the members of the NRC should visit the VA hospital & all the cancer centers in the USA & Canada & spend time with Vet's who used Spent Uranium Ammo & now suffer from all sorts of cancer, or visit those who were on the USS Ragan when Fukushima blew up not just 1 reactor but 4 that is still leaking deadly radiation into the Jet Stream & Pacific & all the experts will not say the word Radiation to the massive die offs of Marine Life, Birds, Insects & the rise in Man Made radiation relation to Fukushima not only on the west coast of N America & but world wide.

The EPA has raised the legal limits so high now it's unthinkable & how corrupt this is to Humanity by a industry that has no respect for the planet what so ever, just profits!

Say no to NO-Threshold, I beg all of you!

Thanks
