NRC Project Number: PROJ0729

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Reference: NRC Letter Dated July 6, 2015: Request for Additional Information for "Licensing Topical Report for Toshiba NRW [Non Re-Writable]-FPGA [Field Programmable Gate Array]-Based Instrumentation and Control system for Safety-Related Application," UTLA 0020P, Revision 0 (TAC No. ME9861)

Subject: **Toshiba Response to NRC RAI Letter Dated July 6, 2015 (TAC No. ME9861)**

Enclosed is Toshiba Corporation's response to the NRC Request for Information (RAI) contained in the referenced letter. Commitments are as listed in the Attachment.

This submittal contains proprietary information of Toshiba Corporation. An affidavit setting forth the basis on which the information identified as proprietary may be withheld from public disclosure is provided in Enclosure 1. Accordingly it is requested that Enclosure 2 be withheld from public disclosure in conformance with the requirements of 10 CFR Section 2.390, as amended, of the Commission's regulations. Enclosure 3 provides the non-proprietary version. If this letter becomes separated from the proprietary material it is no longer proprietary.

Communication with respect to the proprietary aspects of the application for withholding or the Toshiba affidavit should be addressed to Robert W. Schrauder at 704-548-7640 or Robert.Schrauder@toshiba.com.

Sincerely,

Masahiko Hamada

Attachment
Toshiba Response to NRC RAI Letter Dated July 6, 2015 (TAC No. ME9861)

<u>Commitment Description</u>	<u>Due Date</u>
(1) Toshiba will docket the documents required in Question 1 of the RAI letter dated July 6, 2015 (TAC No. ME9861)	August 31, 2015
(2) Toshiba will revise Table II-B-1 of the LTR adding which modules were developed using original process and which were developed using the current process, in response to Question 3 of the RAI letter dated July 6, 2015.	August 31, 2015
(3) Toshiba will revise the LTR clarifying that forced cooling through fans is not required, in response to Question 9 of the RAI letter dated July 6, 2015.	August 31, 2015
(4) Toshiba will revise the LTR or provide references to identify modules that contain EEPROM and/or EPROM, and describe how the data stored in the EPROM is verified, in response to Question 10 of the RAI letter dated July 6, 2015.	August 31, 2015
(5) Toshiba will revise the LTR rewriting the surveillance frequency, in response to Question 21 of the RAI letter dated July 6, 2015.	August 31, 2015

*Proprietary-Withhold from public disclosure pursuant to 10 CFR 2.390.
Upon removing Enclosure 2, this document can be made public.*

Enclosure 1
Letter No. TOS-CR-FPG-2015-0007
Affidavit for Withholding Confidential and Proprietary Information from Public Disclosure
under 10 CFR § 2.390

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

AFFIDAVIT

I, Robert W Schrauder, hereby affirm and state that I am the Vice President, Licensing US ABWR Projects & Technologies, Toshiba America Nuclear Energy Corporation, and I have been authorized to execute this affidavit on behalf of Toshiba to file with the Nuclear Regulatory Commission the following application for withholding Toshiba Corporation's confidential and proprietary information from public disclosure; that I am familiar with the content thereof; and that the matters set forth therein are true and correct to the best of my knowledge and belief.

In accordance with 10 CFR § 2.390(b)(ii), I hereby state, depose, and apply as follows on behalf of Toshiba Corporation:

- (A) Toshiba Corporation seeks to withhold from public disclosure the document entitled and identified as;
 - Response to NRC Request for Additional Information (RAI) Letter Dated July 6, 2015 and all information identified as "Proprietary" therein.
- (B) The Confidential Information is owned by Toshiba Corporation. In my position as Vice President, Licensing US ABWR Projects & Technologies Toshiba America Nuclear Energy Corporation, I have been specifically delegated the function of reviewing the Confidential Information and have been authorized to apply for its withholding on behalf of Toshiba Corporation.
- (C) This document provides Toshiba's lifecycle process and qualification activities for developing and qualifying Non-Rewritable (NRW) Field Programmable Gate Array (FPGA) Based Safety I&C systems to the Nuclear Regulatory Commission. The Confidential Information which is entirely confidential and proprietary to Toshiba Corporation is identified as "Proprietary" in the document.
- (D) Consistent with the provisions of 10 CFR § 2.390(a)(4), the basis for proposing that the Confidential Information be withheld is that it constitutes Toshiba Corporation's trade secrets and confidential and proprietary commercial information.
- (E) Public disclosure of the Confidential Information is likely to cause substantial harm to Toshiba Corporation's competitive position by (1) disclosing confidential and proprietary commercial information about the design, manufacture and operation of the FPGA based I&C platform for nuclear power reactors to other parties whose commercial interests may be adverse to those of Toshiba Corporation, and (2) giving such parties access to and use of such information at little or no cost, in contrast to the significant costs incurred by Toshiba Corporation to develop such information.

Toshiba Corporation has a rational basis for determining the types of information customarily held in confidence by it, and utilizes a system to determine when and whether to hold certain types of information in confidence.

The basis for claiming the information so designated as proprietary is as follows:

- (a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of Toshiba Corporation's competitors without license from Toshiba Corporation constitutes a competitive economic advantage over other companies.
- (b) It consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), the application of which data secures a competitive economic advantage, e.g., by optimization or improved marketability.
- (c) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.
- (d) It reveals cost or price information, production capacities, budget levels, or commercial strategies of Toshiba Corporation, its customers or suppliers.
- (e) It reveals aspects of past, present, or future Toshiba Corporation or customer funded development plans and programs of potential commercial value to Toshiba Corporation.
- (f) It contains patentable ideas, for which patent protection may be desirable.
- (g) It contains security information that could reasonably be expected to be useful to a potential adversary.
- (h) It contains privacy act and personally identifiable information.

There are sound policy reasons behind the Toshiba Corporation system which include the following:

- (a) The use of such information by Toshiba Corporation gives Toshiba Corporation a competitive advantage over its competitors. It is, therefore, withheld from disclosure to protect the Toshiba Corporation competitive position.
- (b) It is information that is marketable in many ways. The extent to which such information is available to competitors diminishes the Toshiba Corporation ability to sell products and services involving the use of the information.
- (c) Use by our competitor would put Toshiba Corporation at a competitive disadvantage by reducing his expenditure of resources at our expense.
- (d) Each component of proprietary information pertinent to a particular competitive advantage is potentially as valuable as the total competitive advantage. If competitors acquire components of proprietary information, any one component may be the key to the entire puzzle, thereby depriving Toshiba Corporation of a competitive advantage.

- (e) Unrestricted disclosure would jeopardize the position of prominence of Toshiba Corporation in the world market, and thereby give a market advantage to the competition of those countries.
- (f) The Toshiba Corporation capacity to invest corporate assets in research and development depends upon the success in obtaining and maintaining a competitive advantage.
- (g) SECY-04-0191 states that security information should be withheld from public disclosure.
- (h) Personally identifiable information is required to be protected from public disclosure by 10 CFR § 2.390.

Further, on behalf of Toshiba Corporation, I affirm that:

- (i) The Confidential Information is confidential and proprietary information of Toshiba Corporation.
- (ii) The Confidential Information is information of a type customarily held in confidence by Toshiba Corporation, and there is a rational basis for doing so given the sensitive and valuable nature of the Confidential Information as discussed above in paragraphs (D) and (E).
- (iii) The Confidential Information is being transmitted to the NRC in confidence.
- (iv) The Confidential Information is not available in public sources.
- (v) Public disclosure of the Confidential Document is likely to cause substantial harm to the competitive position of Toshiba Corporation, taking into account the value of the Confidential Information to Toshiba Corporation, the amount of money and effort expended by Toshiba Corporation in developing the Confidential Information, and the ease or difficulty with which the Confidential Information could be properly acquired or duplicated by others.

Robert W Schrauder
