Subject: Wheeling Jesuit University, Request for Additional Information Concerning Application for a License Amendment, Control 588320

Dear Ms. Wilkinson,

This is in reference to your NRC Form 314 dated July 9, 201, requesting for amendment to Nuclear Regulatory Commission License No. 47-14258-01, Docket No. 03014938. In order to continue our review, we need the following additional information:

1. Your NRC Form 314 should have been signed by a management representative rather than the Radiation Safety Officer. Please submit a letter signed by a management representative indicating that management has reviewed the NRC Form 314 and concurs in the statements and representations contained therein.
2. Based on the license review, it appears that you were authorized for 10 CFR 31.11 materials from September 5, 1979 through July 21, 2005. These materials may have contained isotopes that were greater than 120 days. Materials were previously used in the Donahue Hall as well as the Science and Computer Building. Please submit surveys of any areas released that used unsealed materials with greater than 120 day half-life or state that no unsealed materials with greater than 120 half-life was used. Please see NUREG-1556, Volume 1, Revision 1, "Consolidated NMSS Decommissioning Guidance, Decommissioning Process for Materials Licensees," for guidance on surveys. The simplified survey procedures on page 8-2 could be used for these surveys.
3. Prior to termination of a license, 10 CFR 30.35(g), 30.36(k)(4) and 30.51 require that you submit to the NRC certain records. Please submit the following records, or explain why such records are not applicable.
 - a. for unsealed materials with half-lives greater than 120 days, records for disposal made pursuant to 10 CFR 20.2002 (alternate disposal procedures, including burial authorized prior to January 28, 1981), 20.2003 (disposals to the sanitary sewerage system), 20.2004 (incineration of wastes), 20.2005 (disposal of specific wastes including liquid scintillation cocktail and animal tissue), and 20.2103(b)(4), evaluations of effluent releases.
 - b. records important for decommissioning as described in 30.35(g). Examples of such records include but are not limited to: records of contamination, identifying the radionuclides, quantities and concentrations; as-built drawings and modifications of structures and equipment in restricted areas and locations of inaccessible contamination such as buried pipes; a single list, updated at least every 2 years, of areas to which access is limited for the purpose of radiation protection (restricted areas); and records related to the provision of financial assurance.
4. You submitted several leak tests of sources that were recently disposed but did not appear to include leak tests from sources previously disposed. Please submit the last leak test for all previously held sealed sources which required leak testing. Alternately, you may state that no leaking sealed sources have ever been identified.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office (Address below) and refer to Mail Control No. 588320. If you have technical questions regarding this letter, please call me at (610) 337-5366.

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter, facsimile (610-337-5269), or signed letter attached to an email. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.

Region 1 Office Mailing Address: Licensing Assistance Team, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713.
