**Subject:** [External\_Sender] RE: Cameco's renewal of uranium mine  
**Date:** Friday, August 28, 2015 4:32:54 PM

---

Administrative Judge Michael m. Gibson c/o Nicholas Sciretta and Sachin Desai of the Atomic Safety and Licensing Board Panel:

Please do not allow renewal of the Cameco uranium mine in Crawford, NE. It is a too often forgiven crime against indigenous peoples and other residents. We need to support clean, renewable, and sustainable energies (and not the kind that are simply branded that way). If Cameco can't afford to fix the problems they've caused and will continue to cause, if the mine is renewed, then you should not allow them to continue. If anything, you should make them fix the problems they created, which are now your problems, too.

Sincerely,  
Cat Xia
