Subject: RAI, Amendment purpose and purpose of material and leak testing

Discussion: I asked Mr. Ford why they wanted to transfer material from one license to the other. He said it was because of fees. This would save them on fees for source use on one of the licenses. I asked if the purpose for the material would be the same for the SUB-834 or would it have a different purpose. He said that they used the source for calibration and checking of the licensee's instruments only. It is not used for calibration of portable devices. So I will add it only for that purpose. I called back on 8/12/15, stating that we needed the leak test procedure or a commitment to follow our model leak test procedure.

Action Required: Licensee to submit leak test procedure or commitment to follow leak test procedure in NUREG-1556.
