WASHINGTON, D.C. 20555-0001

September 14, 2015

Mr. Michael P. Gallagher
Vice President, License Renewal Projects
Exelon Generation Company, LLC
200 Exelon Way
P.O. Box 500
Kennett Square, PA

SUBJECT: SCHEDULE REVISION FOR THE REVIEW OF THE BRAIDWOOD
STATIONS, UNITS 1 AND 2, LICENSE RENEWAL APPLICATION
(TAC NOS. MF1832 AND MF1833)

Dear Mr. Gallagher:

By letter dated May 29, 2013, Exelon Generation Company, LLC, submitted an application pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 51 and 10 CFR Part 54 to renew operating licenses NPF-72 and NPF-77 for Braidwood Station, Units 1 and 2 (Braidwood), for review by the U.S. Nuclear Regulatory Commission (NRC). This letter is to inform you of a change in the environmental review schedule for the Braidwood license renewal review.

Regarding the staff's environmental review, by letter dated January 29, 2015, the NRC staff issued a letter revising the environmental review schedule. This revision established a March 2015 issuance date of the Braidwood draft Supplemental Environmental Impact Statement (SEIS). Subsequently, the draft SEIS was published on March 23, 2015.

The reason for this schedule change centers around the Endangered Species Act of 1973 (ESA), which requires consultation with the U.S. Fish and Wildlife Service (FWS) and/or the National Marine Fisheries Service (NMFS) to determine whether endangered or threatened species or their habitats will be affected by a proposed activity and what, if any, mitigation measures are needed to address the impacts.

In response to the Braidwood draft SEIS and biological assessment, FWS submitted a comment letter stating that it did not concur with NRC's initial finding of "may affect, but not likely to adversely affect" for the impact of the proposed activity on threatened or endangered species, specifically the endangered sheepsnose mussel. FWS did not think enough information was available to adequately determine the nature of effects and requested more recent information to determine the possible occurrence of sheepsnose mussel in the action area. FWS makes the final determination of impact to certain ESA species, plant or animal.

M. Gallagher

- 2-

In order to comply with a State of Illinois 2010 Threatened and Endangered Species Issue Incidental Take Authorization (ITA) between Exelon and the Illinois Department of Natural Resources (IDNR) associated with permitting the Braidwood River Diffuser Project, Exelon is required by IDNR to perform a survey of the entire construction zone in the 5th year following initial operation of the river diffuser. The purpose of the survey is to determine if State and Federally-listed species, including the sheepsnose mussel, have colonized or recolonized areas affected by the river diffuser construction and operation. Via an email on August 31, 2015, Exelon informed NRC staff that the survey was scheduled to be completed September 1 and 2, 2015, and the final survey report would be submitted by the end of September. Therefore, NRC will delay issuance of the Braidwood final SEIS from September 2015 to November 2015 to review the results of the sheepsnose mussel study and revise the Braidwood final SEIS as appropriate. Therefore, the final licensing decision for Braidwood License Renewal Application (LRA) will be postponed until January 2016, if no hearing is granted.

Enclosed is the NRC staff's revised review schedule for the Braidwood LRA. There are no changes to the safety review schedule or the final decision for the Byron LRA. If you have any questions related to the revised environmental schedule, please contact Richard Baum at 301-415-0018 or by e-mail at Richard.Baum@nrc.gov.

Sincerely,

/RA/

Christopher G. Miller, Director
Division of License Renewal
Office of Nuclear Reactor Regulation
