

Docket Nos.: 50-269, 50-270
and 50-287

Mr. H. B. Tucker, Vice President
Nuclear Production Department
Duke Power Company
422 South Church Street
Charlotte, North Carolina 28242

JUN 22 1987

Dear Mr. Tucker:

Subject: Emergency Response Capability (TACS 45964, 45965, 45966, 46035, 46036
46037, 46107, 46108 and 46109)

Reference: Oconee Nuclear Station, Units 1, 2, and 3

The NRC licensing staff has reviewed the status of your Emergency Response Facilities (i.e., Technical Support Center, Operational Support Center and Emergency Operations Center). This is TMI Action Item III.A.1.2. of NUREG-0737, "Clarification of TMI Action Plan Items." They are also part of Supplement 1 to NUREG-0737.

By Confirmatory Order dated July 6, 1984, the NRC confirmed your commitments to implement certain post-TMI related items set forth in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability." The Orders confirm that the Technical Support Center and the Operational Support Center are complete in all respects except for Regulatory Guide 1.97 instrumentation; the Safety Parameter Display System (SPDS) is also complete.

On the Emergency Operating Facility (EOF), we are presently reviewing the exceptions you requested in your December 2, 1985 letter. The staff's decision on the outstanding item (RG 1.97) as well as the other requested exception (EOF) continue to be under review. The schedules for these two issues will be incorporated in the Confirming Order when the review is completed.

The ERF will be audited against the staff's requirements by NRC Region II in an ERF appraisal. With this letter, TACS 45964, 45965 and 45966 on the TSC; 46035, 46036 and 46037 on the OSC; and 46107, 46108 and 46109 on the EOF are considered complete.
