General Comment

Thank you for the opportunity to comment. I'm an environmentalist and believe in leaving this planet in much better shape than when I inherited it. I also believe in life, civilization, and the realities of electrical supply and demand.

That being said, Diablo Canyon (and nuclear power, in general) provide safe, clean and cost effective energy that should be encouraged and continued. By providing large baseload emission free electrical supply, Diablo provides safety, security, and clean air for our society.

Please consider that if the plant is closed, we will essentially be expanding the use of fossil fuels (burning gas or coal) and we will be polluting our environment even more.

Thank you so much.
