Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

Your letter of May 18, 1979 required Duke Power Company to demonstrate acceptable flow rates and flow stability with only two operating steam driven emergency feedwater pumps when all three Oconee units are operational and that this test plan be reviewed by ONRR before the test is performed.

Accordingly, please find attached a copy of the Oconee Nuclear Station Emergency Feedwater Flow Test Procedure, TT/O/A/325/02. This test procedure has been reviewed by appropriate Duke Power personnel. It is intended to perform this test promptly following restart of Unit 3 when the required test conditions can be met. Currently, Unit 3 is expected to be taken critical June 11, 1979.

Very truly yours,

William O. Parker, Jr.
