Re: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

In a letter dated August 21, 1979, the Staff requested that a detailed analysis of the thermal-mechanical conditions of the reactor vessel during recovery from small breaks with extended loss of all feedwater be performed. My letter of August 31, 1979 stated that a report of this analysis would be provided by December 31, 1979.

This analysis effort is in progress and is currently expected to be provided to Duke by B&W by February 7, 1980. Following our internal review, the report will be submitted by February 15, 1980.

Very truly yours,

  
William O. Parker, Jr.
