

Catawba Nuclear Station  
2015 NRC Initial Reactor Operator Written Exam  
Post Exam Submittal

**POST EXAM COMMENTS**

The Reactor Operator (RO) and Senior Reactor Operator (SRO) exams were administered as two separate exams. The exam as administered to the RO students was the exam submitted to the NRC in the 45 day letter, with no changes made. The SRO exam (75 RO questions and 25 SRO questions) administered to the SRO students was the exam approved by the NRC, with no changes made. The questions contained on the RO exam are not the same questions as contained on the RO portion of the SRO exam. The RO questions on the RO exam, as administered, adequately addressed the exam sample plan. CNS is submitting the RO exam, as administered, for review and final approval by the Chief Examiner.
